

Iran Energy Club

We Fight For New Ideas ...

We Are Iran Energy Club

Iran Energy Club is an utterly private and independent body, comprising researchers, experts and artists who look at the developments of Iran, the Region and the world in the field of energy, from a new perspective. Having commenced organized professional activities from 2010 with the establishment and managing professional teams in four fields including News, Media, Graphic and Industrial Animation, this club has managed to carry out many projects for over 210 companies, all of them active in the fields of oil, gas, drilling and petrochemical industries.

In the other word, Iran Energy Club is an innovation hub that continuously seeks gaps in the Iran Energy market in order to establish new groups, at the same time creating multiple job opportunities, for young and talented artists. We're perfectionists, Idealists and Creators. We do work, we're proud of; Work that makes an impact on our clients business. We do it by bringing bright people together from all walks of life and every imaginable background, letting them loose on a challenge, and giving them the freedom to explore the possibilities. We are problem-solvers, solution-finders, and askers of "what if?" We help you tell your story in the most authentic way possible and delivered in a strong, beautiful, thoughtfully crafted manner. When you trust Iran Energy Club with your project, you can count on the same proven, time-tested approach that has made hundreds of previous projects successful. So let's get started. Meet our team, see our works and read about a few reasons, why you should consider cooperation with Iran Energy Club.

Mohammad Sadegh Amini
The Founder & Projects Manager

What Makes Us Different?

When you sit with us for the first time, you'll find that your project is already half way complete. You won't have to waste precious time explaining the fundamentals or even some of the more complex subject matters. We get it. In fact we are more than just experienced journalists, designers, our animators. We're your partners! As a strategic, branding, and marketing group in the oil industry, we have the right team to service your needs. Or, if you're unsure of your exact needs, we can help you with that too! We ask the right questions to get to the heart of your challenges, and then work with you to design meaningful solutions. We are purposeful in selecting organizations to work with, because we don't just want clients. We want partners. Similarly, you should be purposeful in selecting a group that understands your mission and its goals.

When you work with Iran Energy Club, you get a passionate team working to make your projects and your organization successful. We would love the opportunity to show you what we're made of and what we can make of your project. At Iran Energy Club it is all about you and your business in the oil industry. We pride ourselves on building strong, solid and long lasting relationships with the people in the industry that we deal with. With free advice and excellent communication throughout your project, the Iran Energy Club team, handles all your design, printing, web, industrial animation, documentary, news and social media needs. From the initial steps, our team manages the entire process so that you are free to spend your time building your business.

The Power Of Integration

We believe every company has a story to tell in the oil and gas industry. We can bring that story to life through a variety of services we provide. We're all about big, fresh ideas and solutions. In fact, Iran Energy Club joins clients in the effort to tell their stories. We first listen and ask the questions that bring the brand to life. We then work with clients on ways to engage and move their audience. Besides the experience of the founder and our members, an important strength of Iran Energy Club is our breadth of services. Not many firms (if any at all) have our full range of services under one roof ... industrial animation, graphic design, documentary, news and media support and so many more. With our many strategic partnerships, we have the ability to grow virtually and immediately to fully meet the needs of any client with any project.

Why Iran Energy Club?

Iran Energy Club's management staff is fully determined to turn this group into a creative-ideas think tank for the Iran's energy industry in all four of its main activities. In an aim to achieve this goal, Iran Energy Club as an utterly private and independent body has done its best to create many distinctions on its own, without receiving any moral and material supports. Our most important points of distinction, which have been institutionalized in us and contain no advertising slogans, are as below:

- We think and work in a group.
- We would work with international standards.
- We have answers to all your questions.
- We fight for new ideas in the field of energy.
- None of our employers are dissatisfied from our services.
- Working in the field of energy is our biggest mission.
- We train all of our staff to work in the field of energy.
- We enjoy a creative, experienced and motivated, management staff.
- We perform no energy project without enough research.
- We enjoy a professional and comprehensive archive and an advanced database.
- We analyzed all the international projects in the field of our activities.
- We share our experiences with your company, not trying to gain an experience.
- We accept new projects based on our capacities
- We give our employers the right to choose in all circumstances and make the best decisions.

- We think well, decide properly. We accomplish very quickly and work precisely.
- When we accept to carry out your project, we take responsibility for the entire project on your behalf.
- We believe that all of our employers are the largest and most important companies of the world.
- We work based on the timetable and the delivery time of the project is exactly the same was fixed at the beginning of the project.
- Before we start a project, we make sure we have fully understood your demands.
- Iran Energy Club never has performed and will not carry out a project which is irrelevant to energy industry.
- We not only fully supervise our own activities, but also keep our eyes on the activities of our contractors until the delivery time of the project.
- We think to all the details of the project and in no circumstances we fail to meet your demands.
- We enjoy a coherent, young, creative, capable, determined and very motivated staff to provide the best services to your company.
- Iran Energy Club has fully capable to render services in its four main fields of activities, which only are in its monopoly.
- In collaboration with Iran Energy Club, you would accomplish your desires very easy, with high quality and reasonable price.

We Creat Your Imagination ...

Get To know Us, It's Worth It

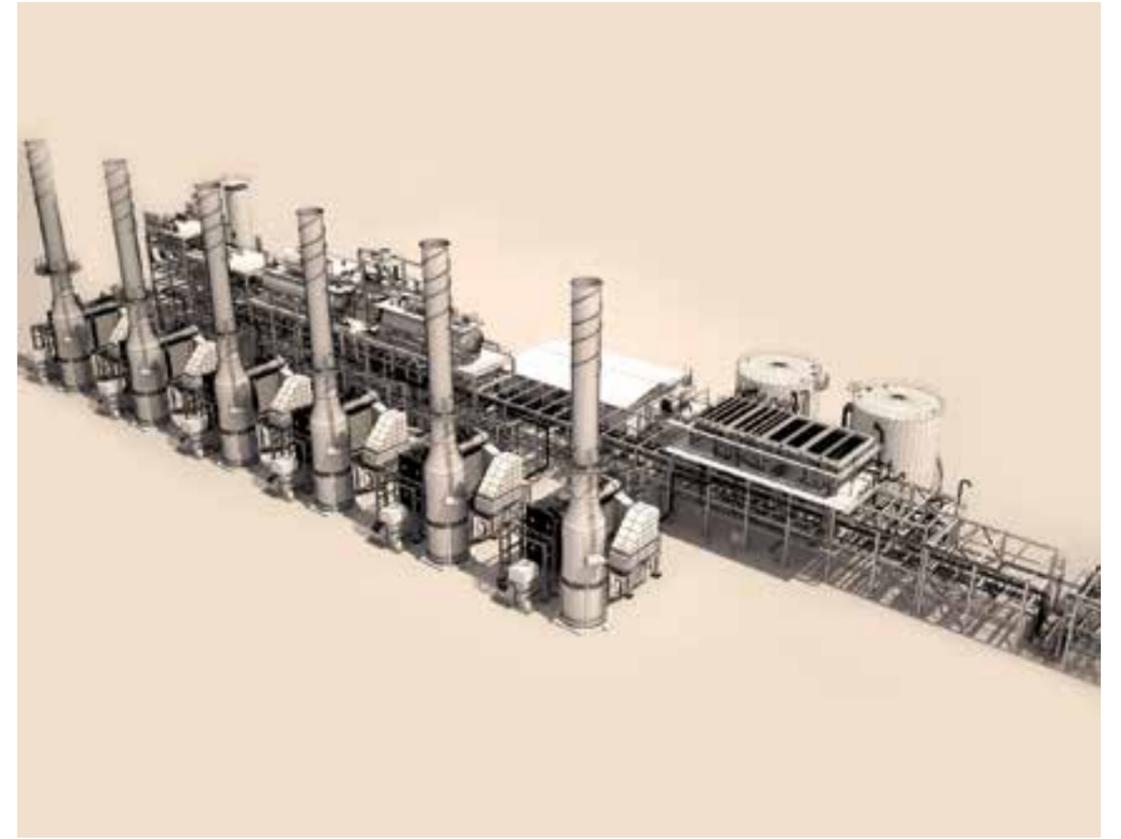

Iran, as one of the world energy centers, every year sees many large-scale projects being implemented in the field of energy, especially oil, gas, petrochemical and drilling industry. The execution of such a large number of projects and also the constant emphasis of the government authorities on the necessities of correcting the consumption pattern, made Iran Energy Club to establish Iran Animation Studio along with the general policies of the government and familiarizing people with complicated processes, like exploration, development and exploitation of the country's energy resources.

This studio whose present activities considered one of the biggest honors of Iran Energy Club, not only greatly admired by senior managers and authorities of the Iranian oil industry due to making high quality and precisely engineered animations, but also has captured attention of many people to its special capabilities to produce any kind of industrial animations in the field of energy. In the meantime, Iran Animation Studio managed to execute several international projects and now many big oil and industrial companies, are corresponding with us to produce their required animations. For more information about what we do, how we work and why you should trust us for your animations, please study the next pages to see how we have teamed with executives, engineers and sales and marketing departments to make some of the most complex ideas and technologies come to life.

How Do We Start?

We start with getting to know your company. We consider ourselves an extension of your team, and offer the same level of dedication as a full-time employee. Once we understand your brand and goals of the project, we can get to work on your animation featuring oil drilling, exploration or any other custom concept that could utilize oil and gas animation to bring it to life. Your approval is always requested in the storyboard stage, and we give you the chance to review the visuals before animation is applied.

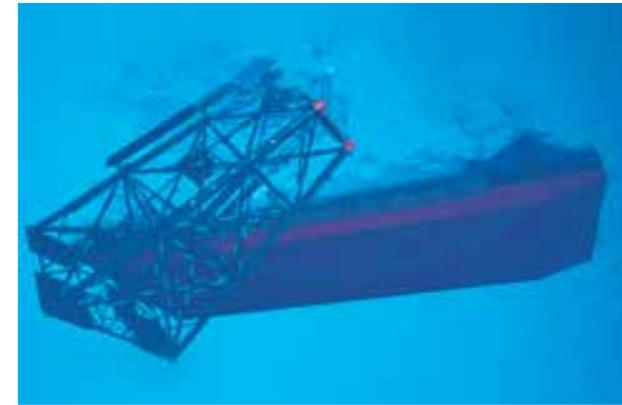

We Care About Details

We apply the same attention to details and standards of quality against every project that comes through our doors, no matter how big or small the project and or client may be. In fact We are not concerned about the number of projects we can take on at once and how quickly we can crank them out. Our focus, has and will always remain on the customers and their complete satisfaction. That is why we maintain a small creative team comprised of animators and designers that are among the best in the industry.

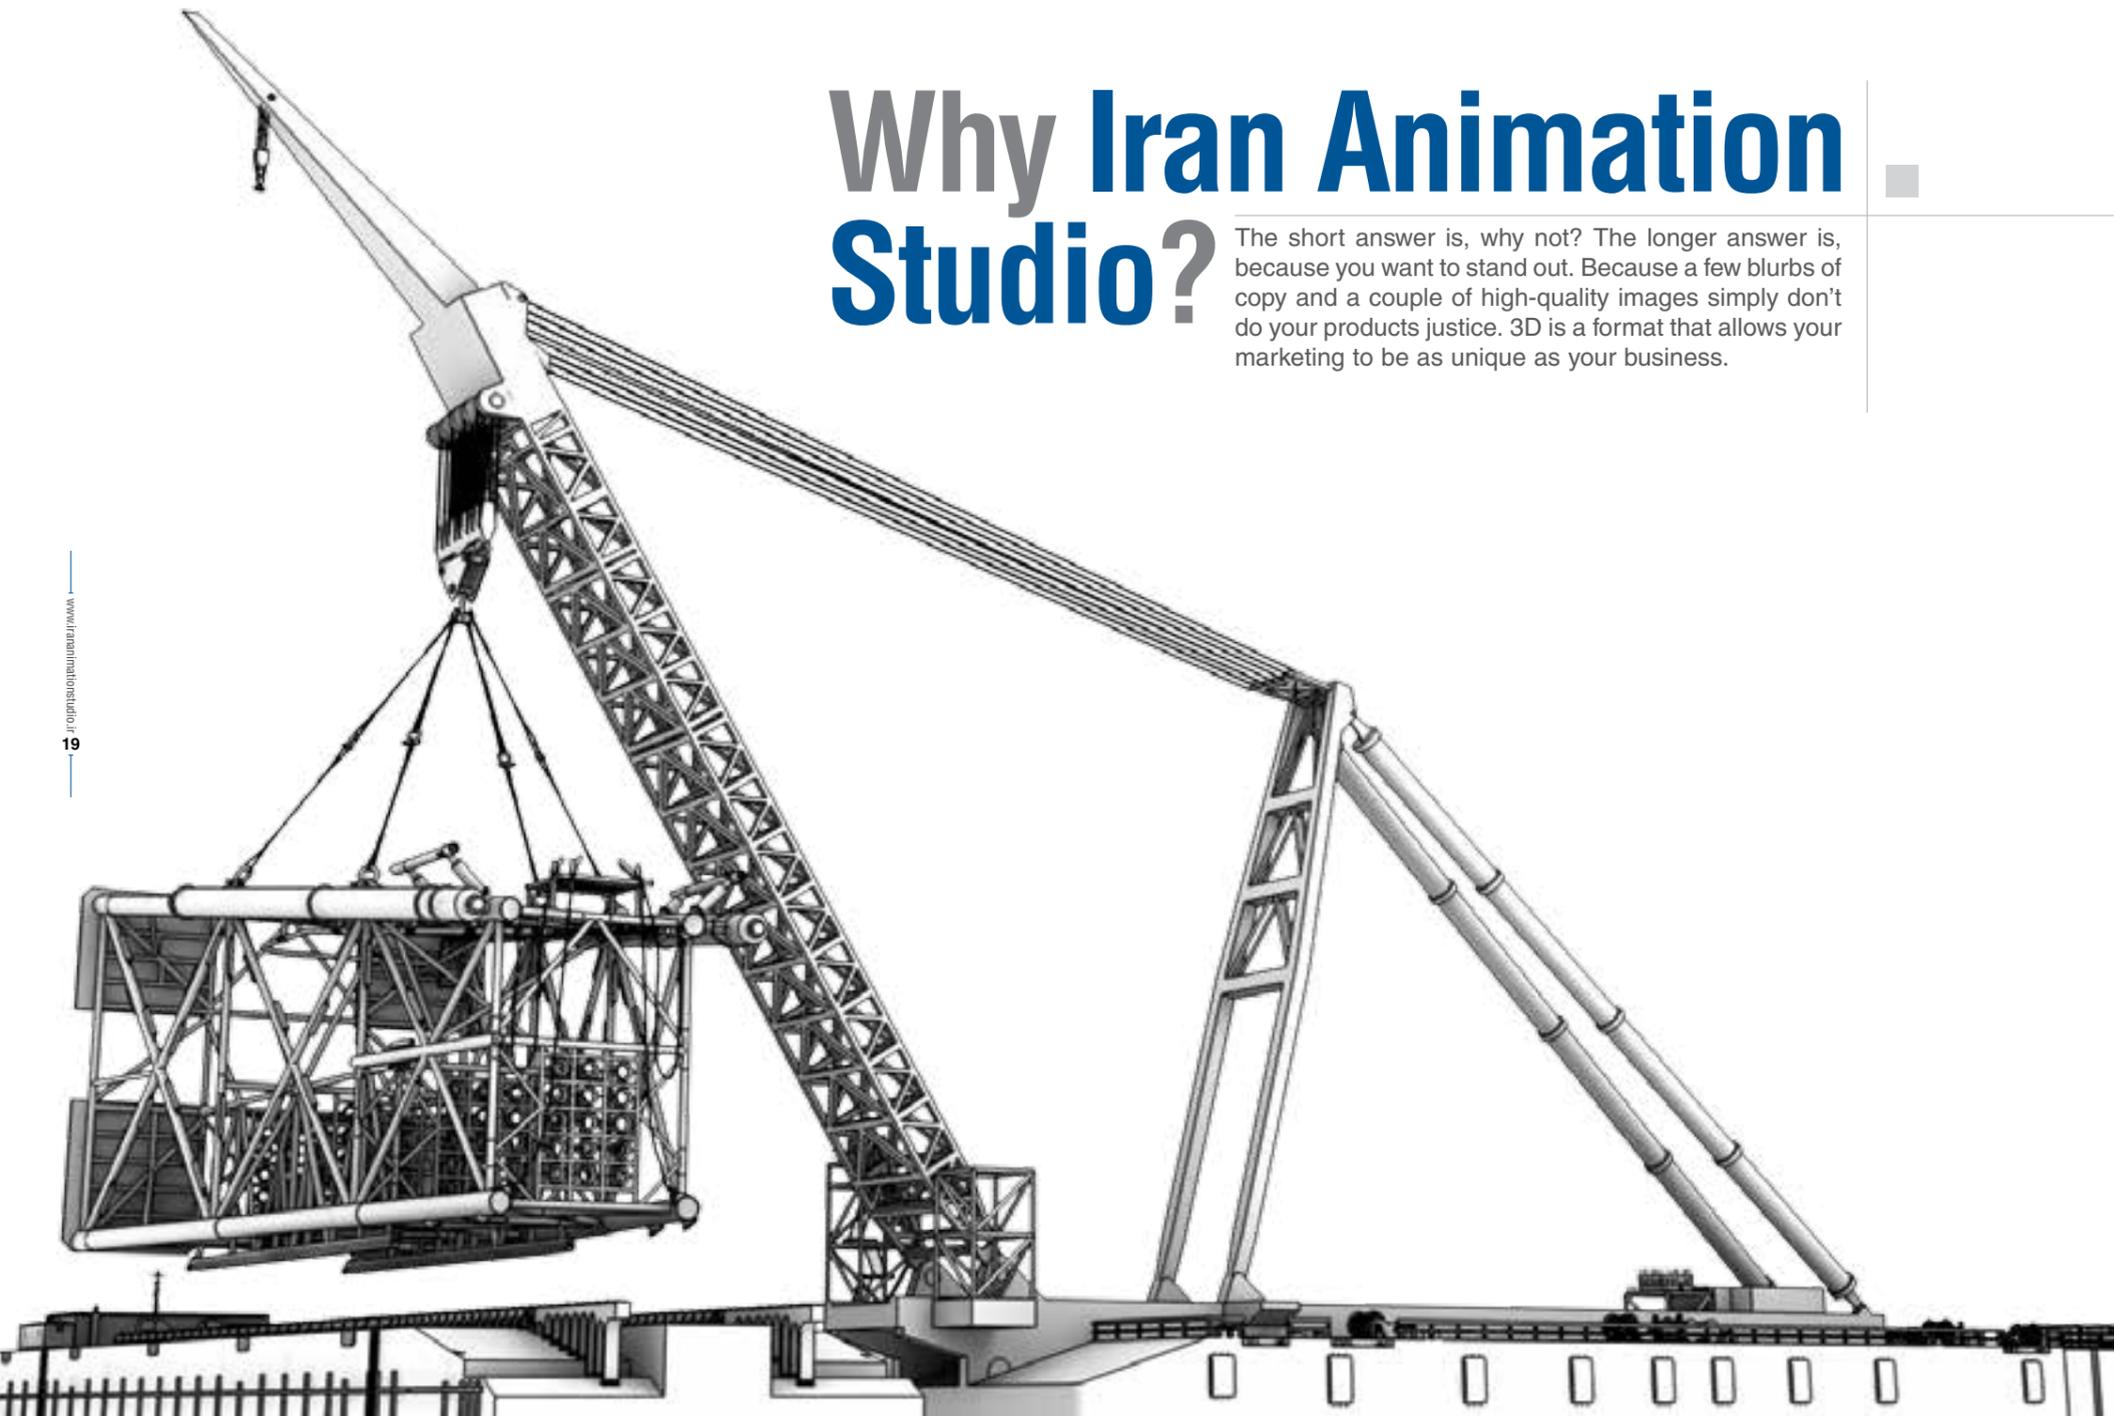

We Know What You Do

From demonstrating new technologies to realistically portraying specific processes, 3D animation is a powerful tool in the oil and gas world. We have a long history of developing 3D content for service companies and operators in the private sector, and have built one of the largest libraries of oil and gas models in the Oil industry. Our animators and producers understand oil and gas processes and have assembled a large portfolio that demonstrates our expertise.

Why Iran Animation Studio?

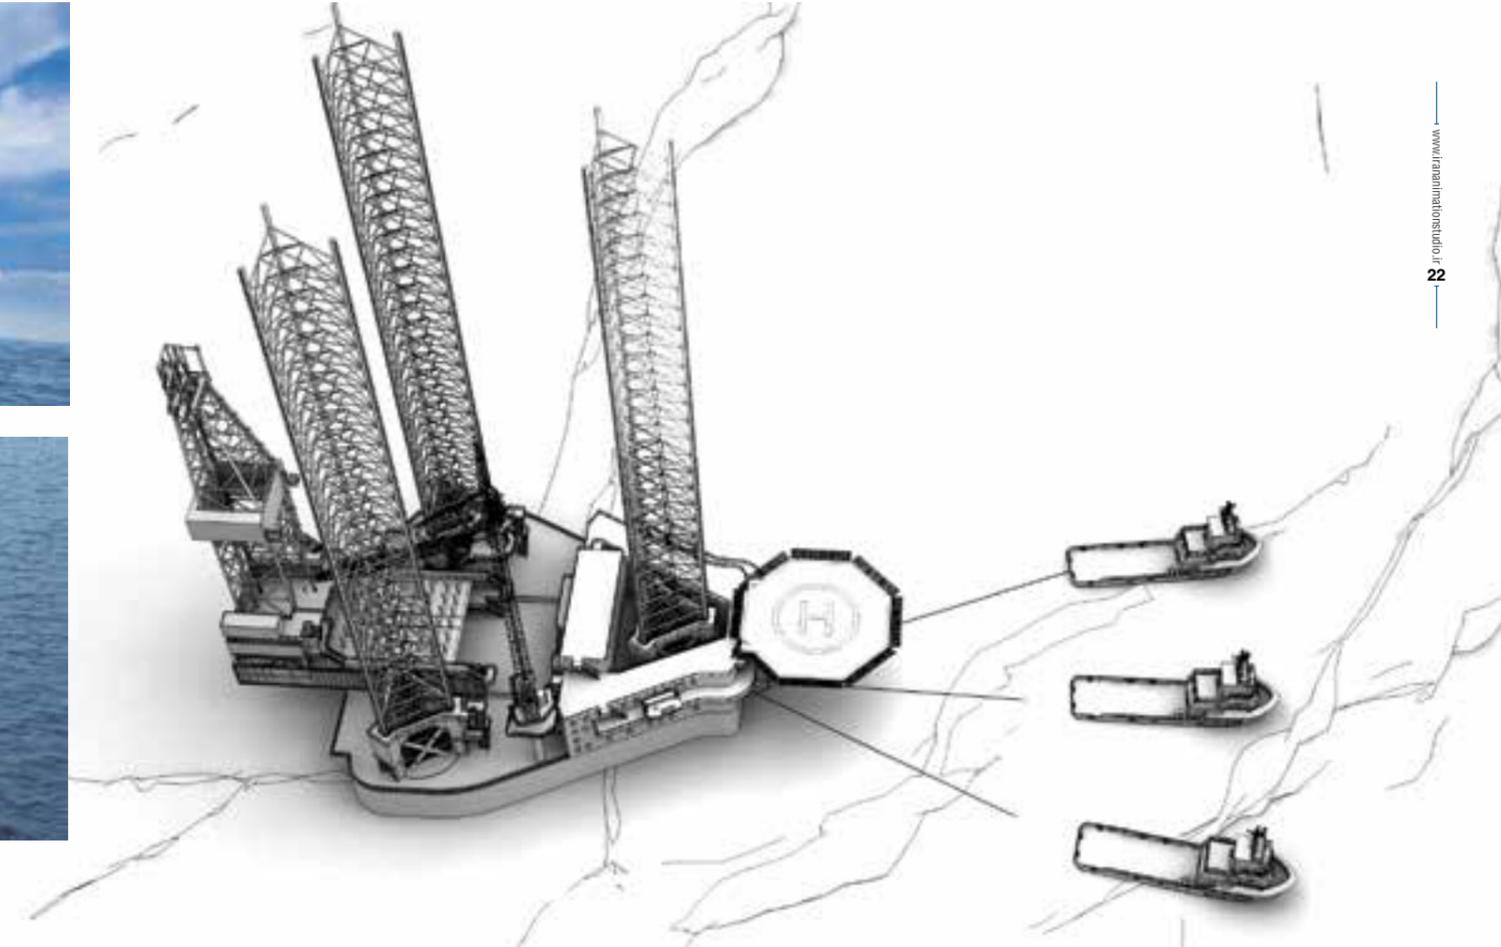

The short answer is, why not? The longer answer is, because you want to stand out. Because a few blurbs of copy and a couple of high-quality images simply don't do your products justice. 3D is a format that allows your marketing to be as unique as your business.

You Can Control Your Project

Every one of our clients has access to our account management, project management, and creative teams at all times throughout the duration of their projects. Since we are relatively small in size, all of our team members work closely with one another on a daily basis to ensure everything runs like a well-oiled machine. Our goal is to provide our clients with a level of comfort to where they can come to us at any time with anything that may be on their mind. We sure at the end of your project, you see us as a member of your team, instead of an outside animation studio.

We Love What We Do

We are happy to tell you that today, Iran Animation Studio is a well-known group, and a powerful pioneer in the field of high quality 3D rendering and animation services for oil and gas companies. It didn't take us long to gain a recognition for our works. Our dedication and diligence in delivering high quality results, earned us high reputation in the oil industry and we keep to do the same.

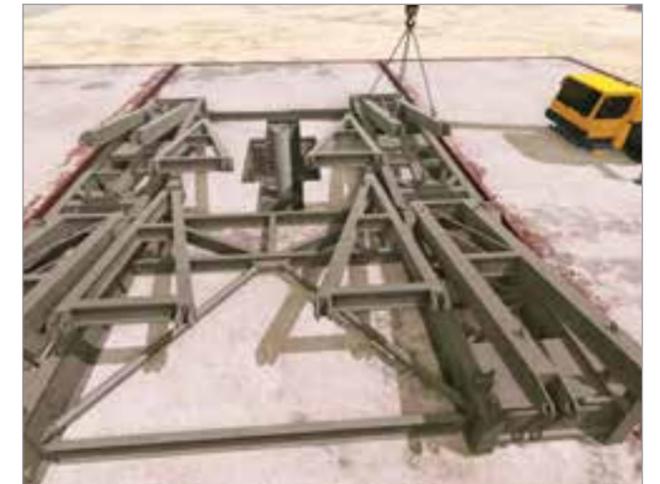

We Have Engineering Background

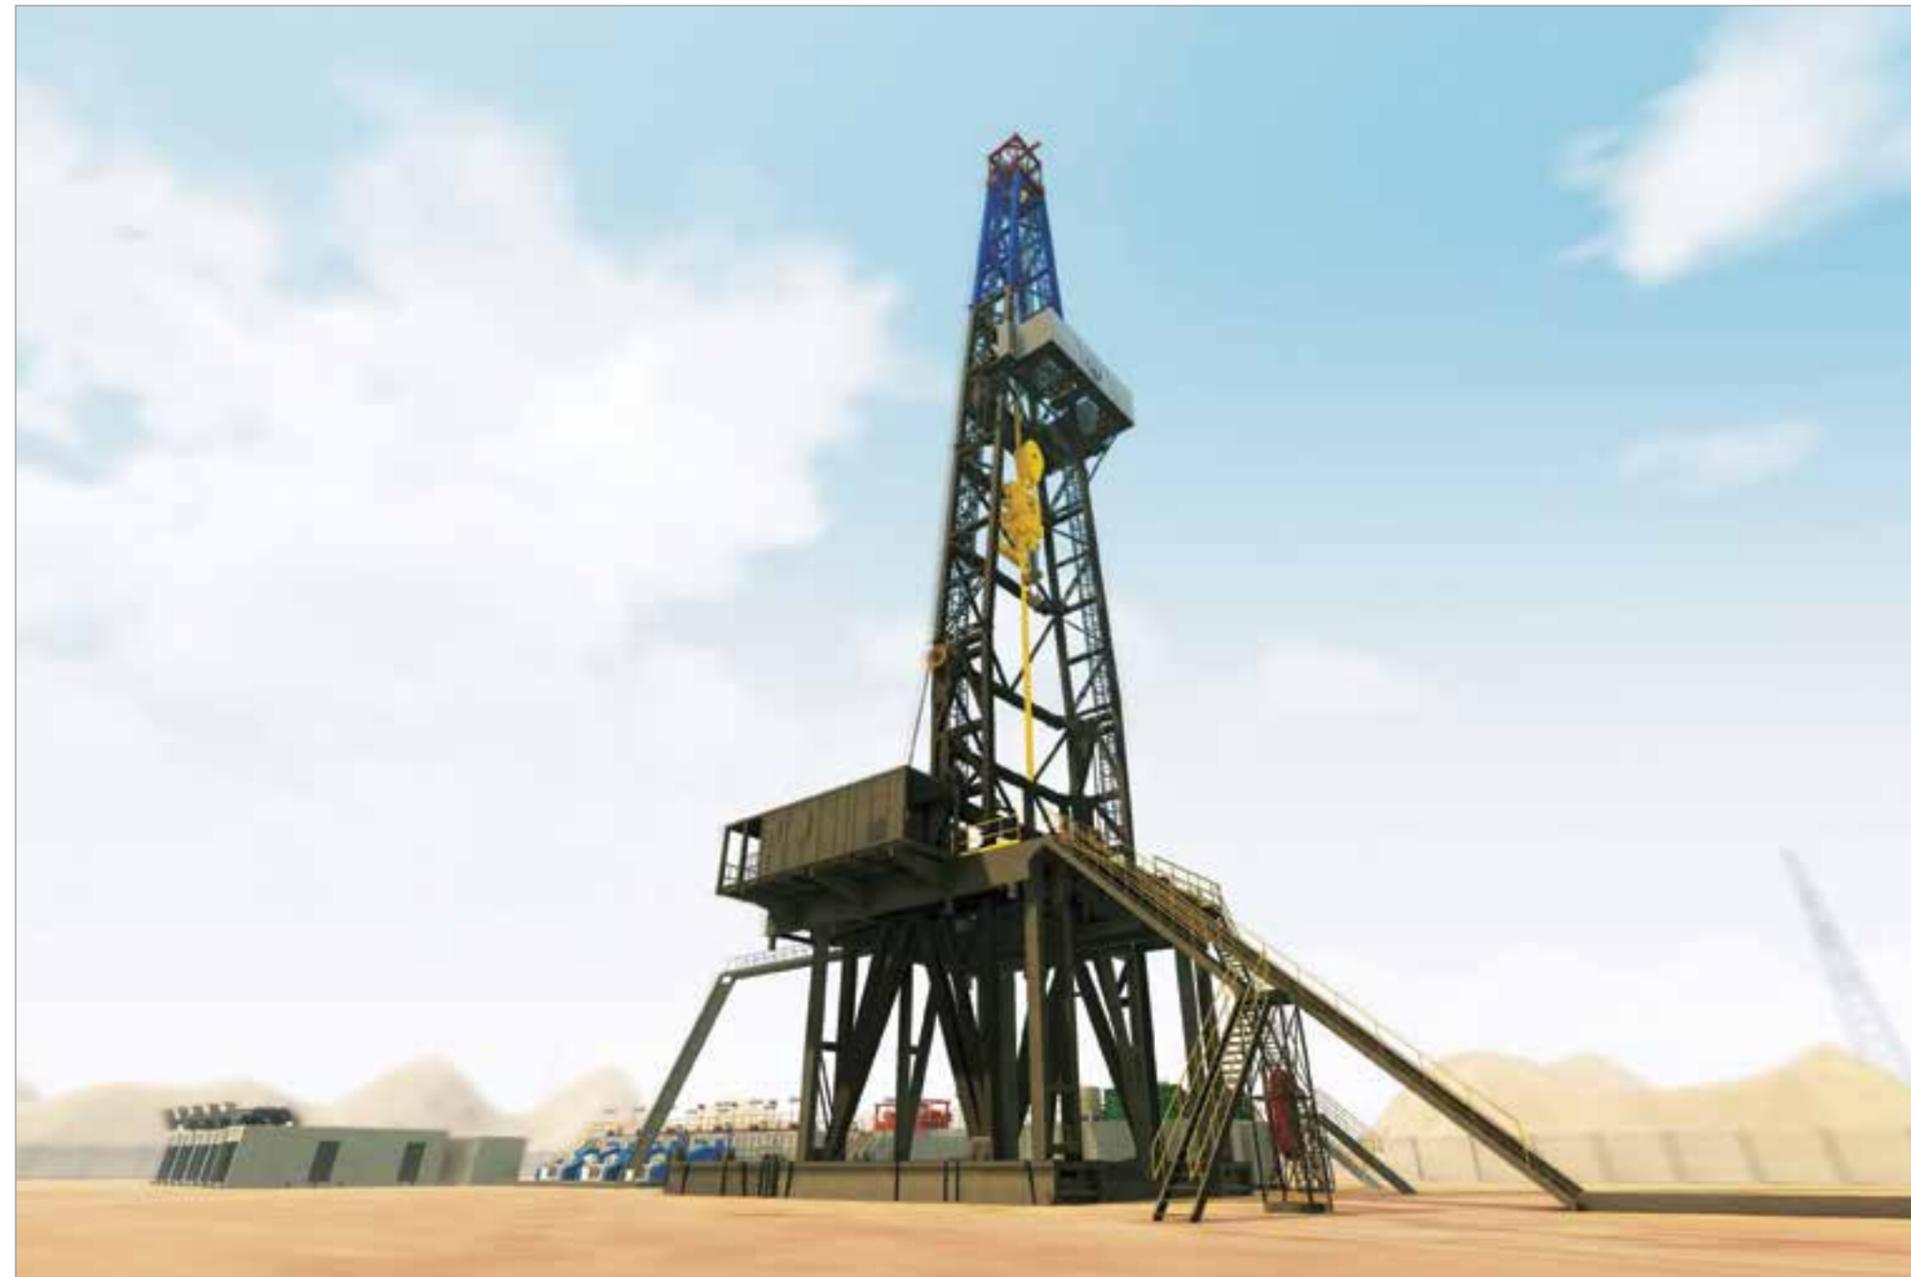

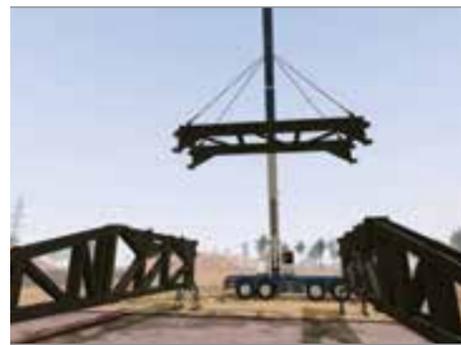

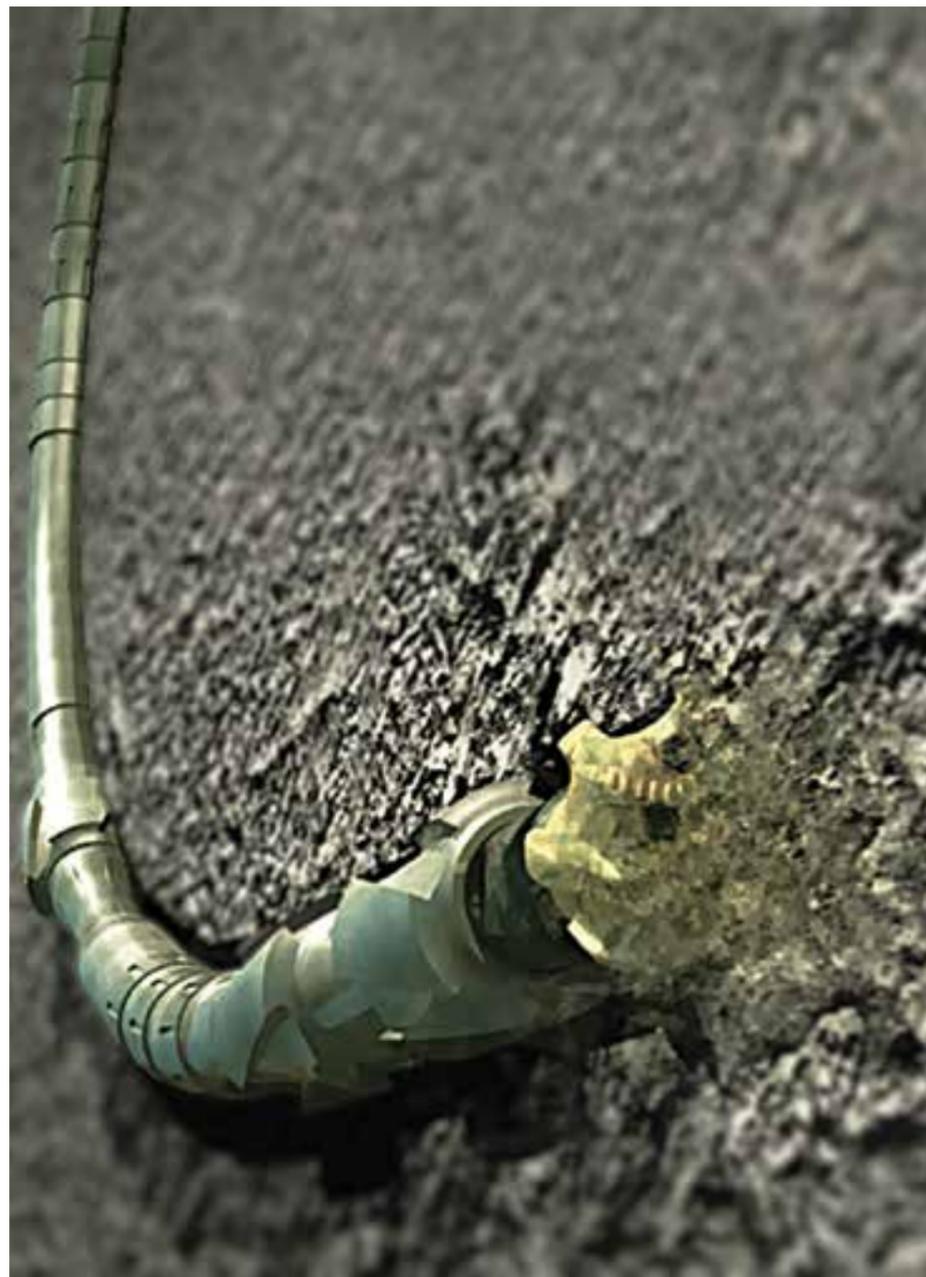

Whether you are in exploration phases or feasibility studies through to execution, we can bring your project to communication clarity with clear, pertinent and technically correct graphics and multimedia animations. Our engineering background allows us to take raw technical data and generate communication aids that the financial community, community leaders and pretty much anyone who doesn't have an engineering background, can quickly understand.

Use Animation To Avoid Danger

There are many safety concerns in the oil and gas industry that can be illustrated, techniques for offshore drilling, methods of distribution and transportation, operations and processing facilities, and technological advancements coming in the future that will benefit these natural resource industries. Our Solutions can create in class training simulations for hazard recognition and other safety animations and videos with an animated 3D Character, showing the do's and don'ts, to avoid fatal accidents, which would be impossible to show with live video.

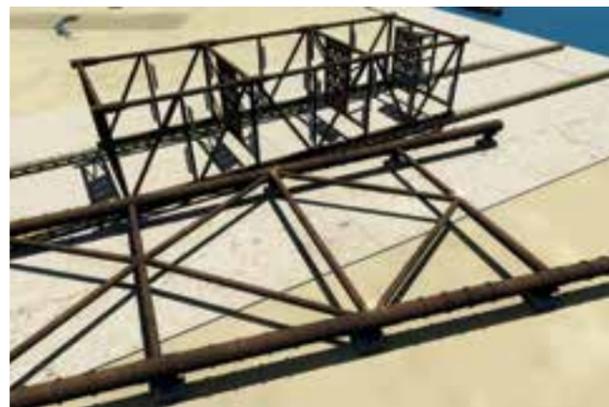

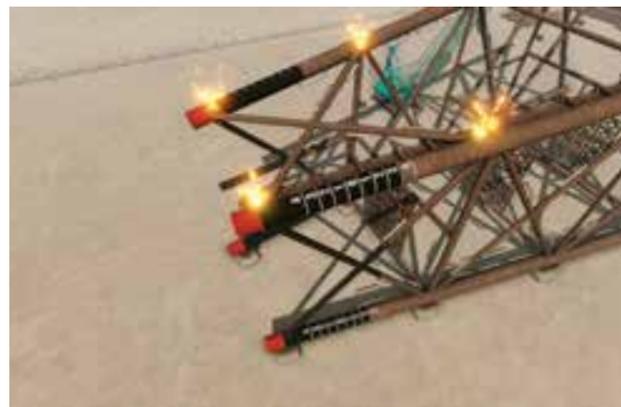

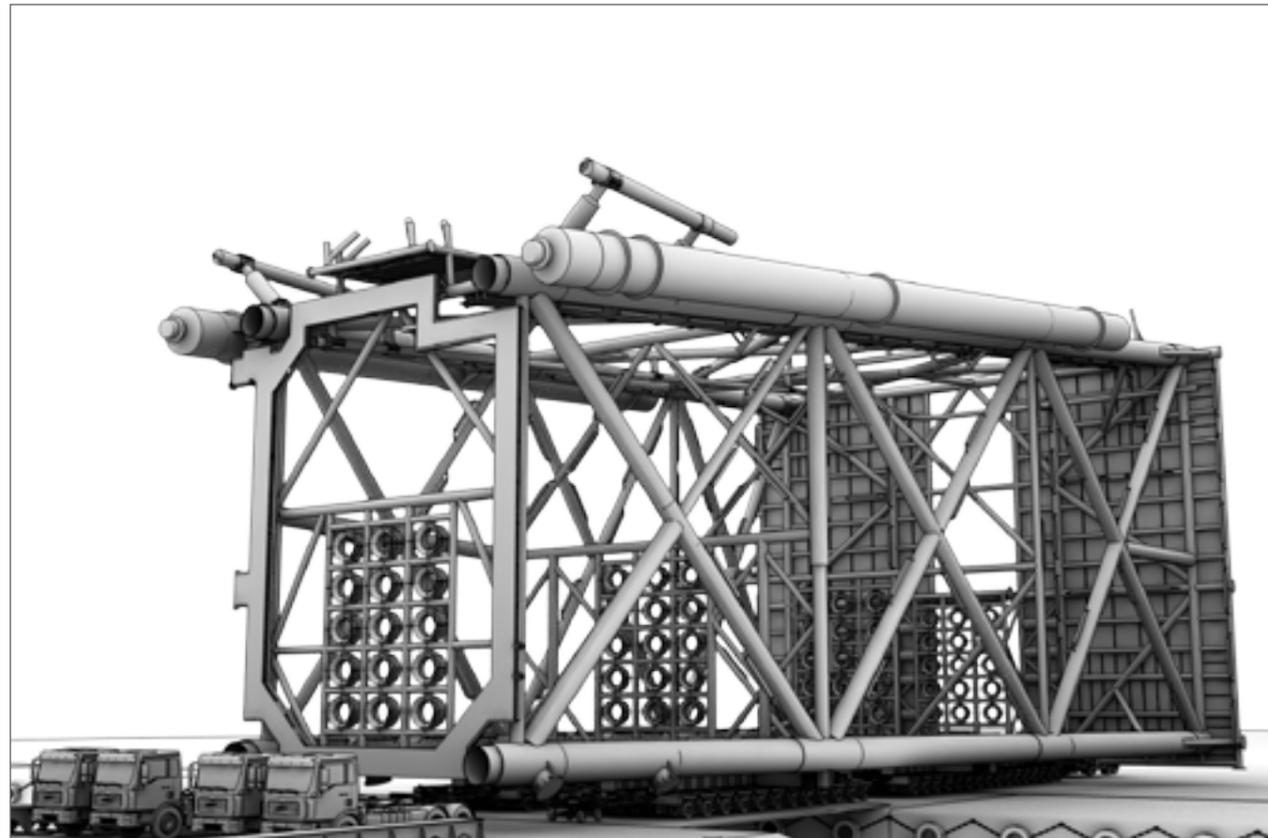

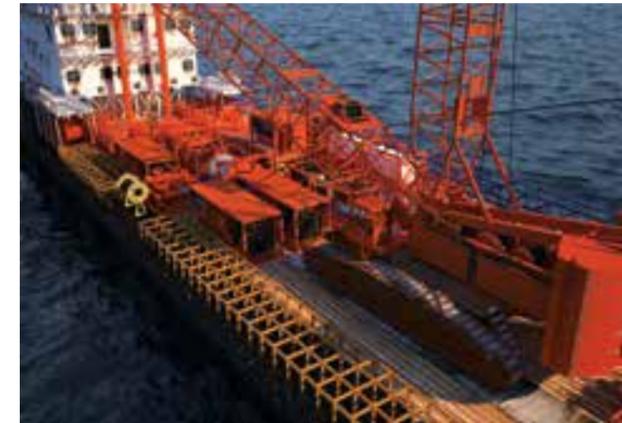

We Create Your Imagination

Your oil and gas industry animation must be informative, aesthetically pleasing and accurately reflective of your company brand. Iran Animation Studio has the team and tools to make that happen for you. Tell us your vision for your oil, gas, petrochemical animation, and we will make that dream a reality. In fact we create your imagination.

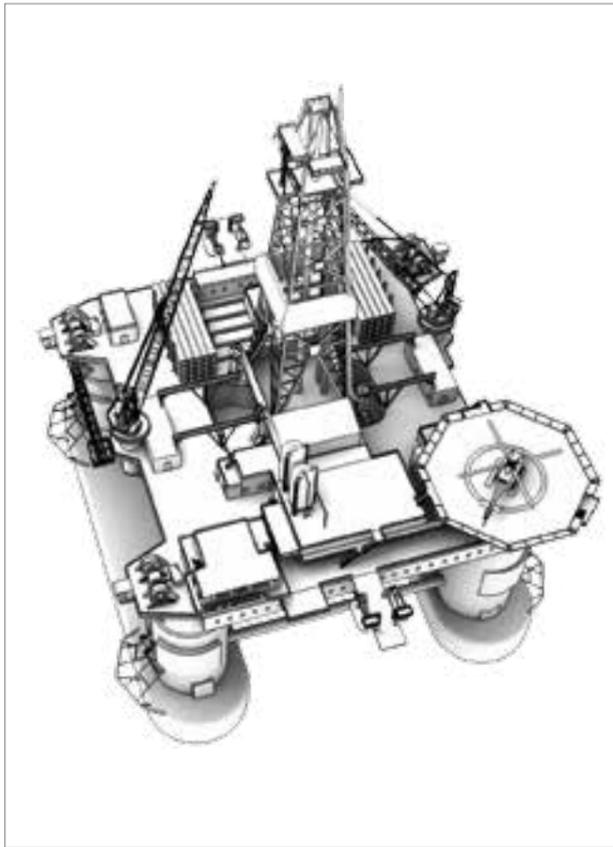

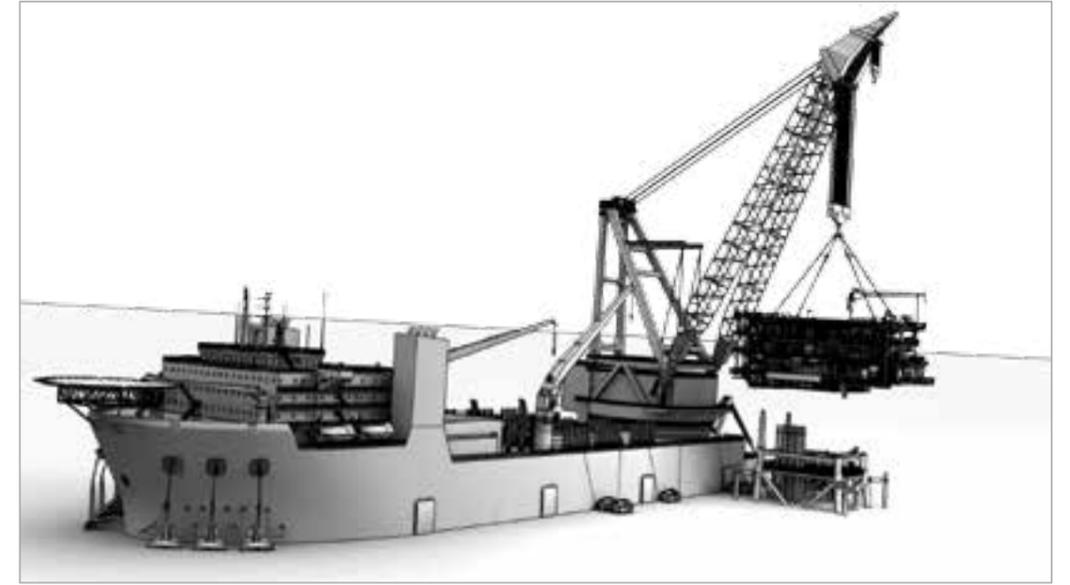

We like New Challenges

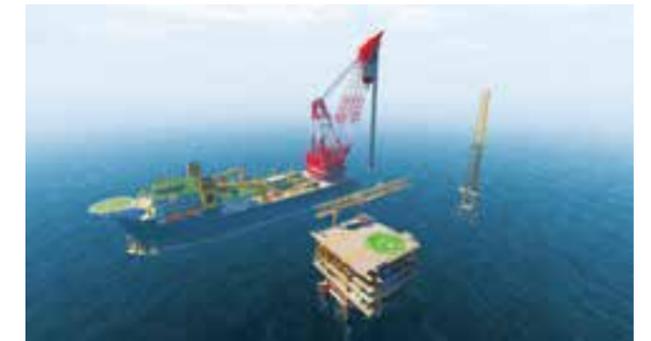

We are deeply intertwined within the oil and gas animations – from onshore to offshore, to subsea and beyond. That's why we look at every presentation as a new challenge to get your heart racing; your blood pumping and excited about what's going to happen next. It's that emotion, coupled with your key messaging, that helps drive sales and impacts your bottom line. In fact when you sit with us for the first time, you'll find that your project is already half way complete. We would love the opportunity to show you, what we're made of and what we can make of your project. We admit it. It's true. We're All Up in Your Business

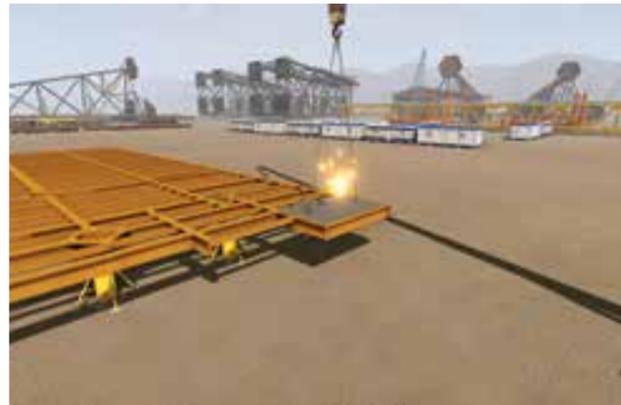

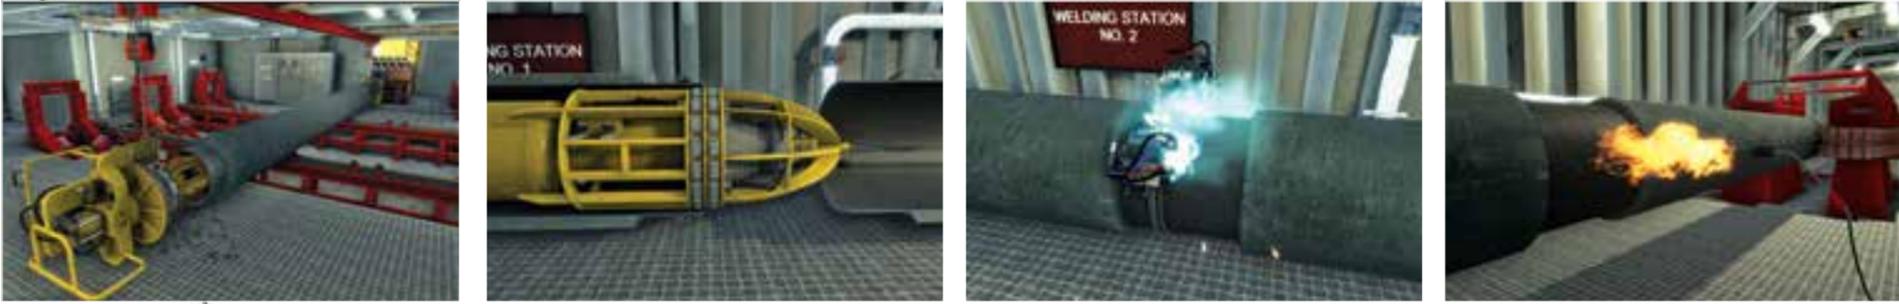

Interact With Clients Through Animation

In past decades, your option was to leave a business card and some documents with a potential client. But we can custom draw and do the modeling of the equipment, your company has patented, so there is no loss in translating the animation to reality. Although everything we do, begins with a hand drawing or basic digital design, but the final oil, gas animations, will offer a dynamic illustration of your larger vision.

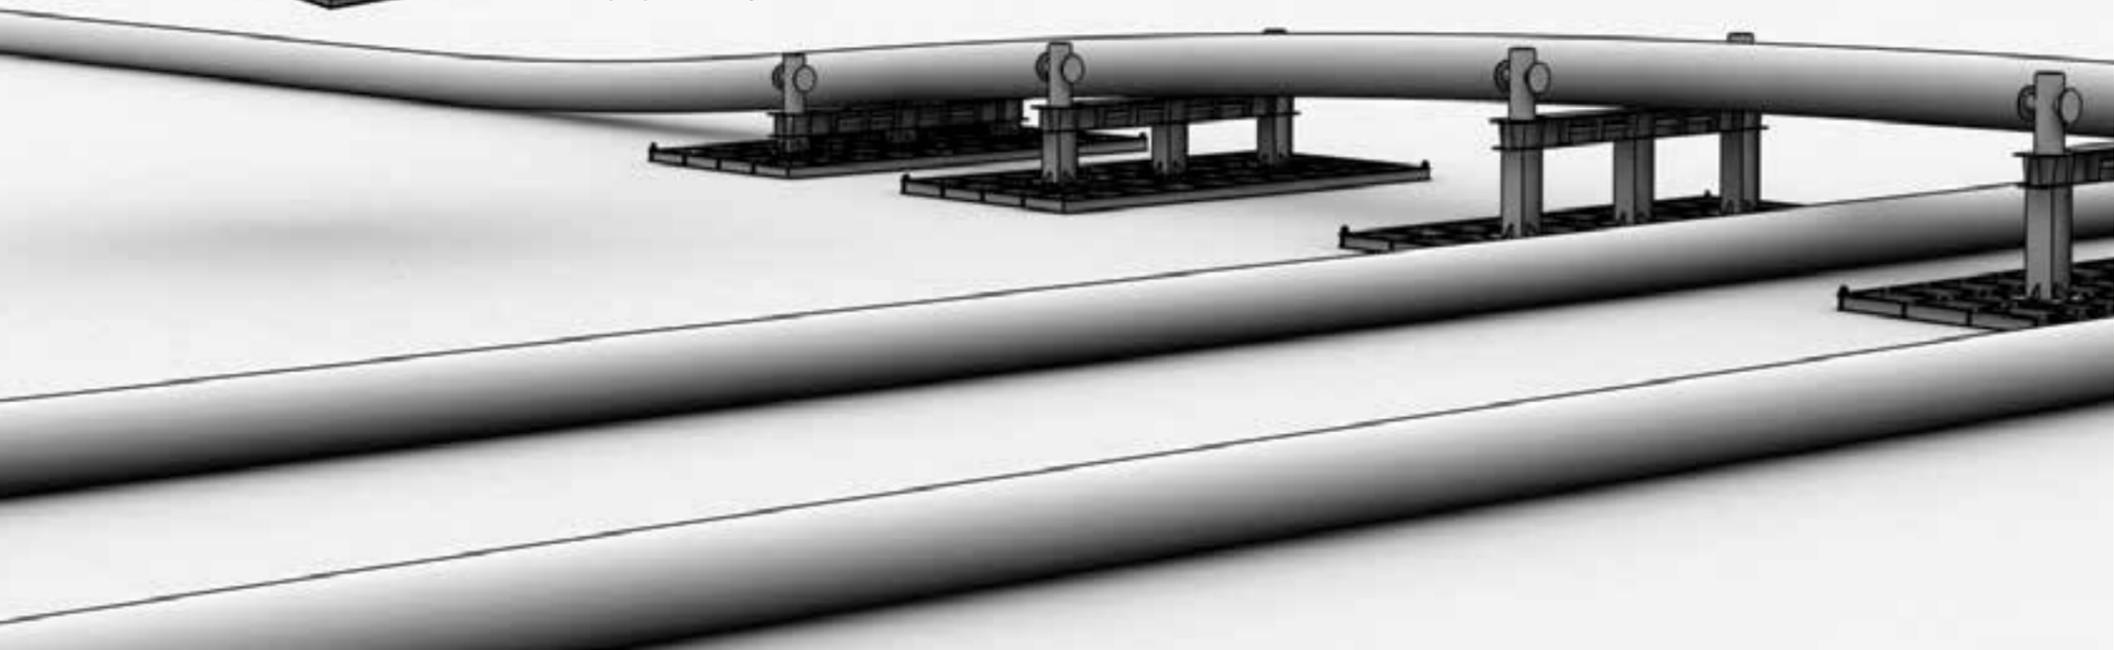

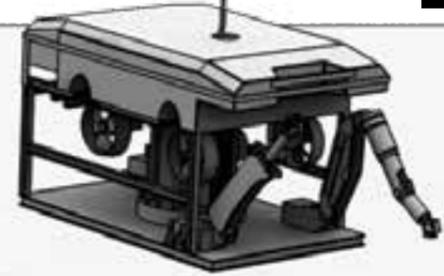

■ Where Exceptional Talent & Technology Meet

Iran Animation Studio is a full-service 3D animation studio that provides any and all of your animation needs in the energy industries, including oil, gas, petrochemical, drilling, offshore, renewables and Our design process is tailored to fit your needs, from ideation and storyboarding to the production of your final products. Over the years, we have accomplished the most sophisticated projects with great ease and quality. It is our promise to you that we will not stop working on your project until you are satisfied.

Good Graphic Gives Energy ...

Telling Your Company Story

Islamic Republic of Iran, as one of the most important energy supplying centers, is the activity point of thousands of small and big companies which work in various energy fields for supplying energy, domestically and internationally. A large number of companies and their active participation in many industrial fairs, which are held in Iran and across the world caused the Iran Energy Club to employ and train creative and motivated graphic designers in order to fulfill the said companies growing needs in industrial graphics and to reflect the achievements and capabilities of the domestic companies.

In this respect, Iran Energy club by establishing Iran petro Graphic Group, as its specialized arm in offering industrial graphic services, not only is fulfilling the domestic companies' graphic needs, but also due to its exclusive capabilities, the foreign companies in the world show interest in receiving such services. We can provide a comprehensive graphic design and brand identity. From logos/branding, brochures, web design, flyers, stationery, annual reports and much more for every company in the oil and gas industry. Please visit our website for more information on the implemented projects and capabilities of the group.

Iran Petro Graphic Core Goals:

- Provide a flexible working relationship with our clients
- Maintain the highest level of design
- Guide the design process
- Deliver on timelines

Fully Mobilized for all Offshore Missions

Why You Need Petro Graphic Services?

A strong brand image can convey that your company is far bigger than it actually is. If a company looks professional, your potential customers are more likely to trust, that you can deliver what they need. That's why a large percentage of people remember what they see far better than what they hear or read. Therefore your brand image can highlight your competitive advantages and tell others how you do business. We are ready to offer a truly magnificent marketing experience, from client service right down to the final printed product and make your employees proud to hand out your company's marketing tools.

We Have The Highest Standards

When it comes to quality and service, we have set the highest standards for ourselves. We very strongly base all our graphic design services on an interactive process. Our services also include understanding your company, your corporate values and your company vision. All of this enables us to deliver top quality products with quick turnaround time, while keeping the cost low.

We Guarantee Our Design & Printing

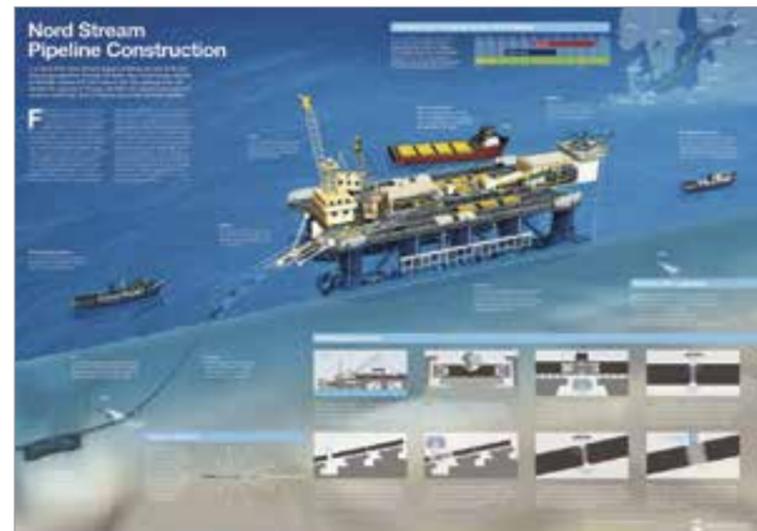

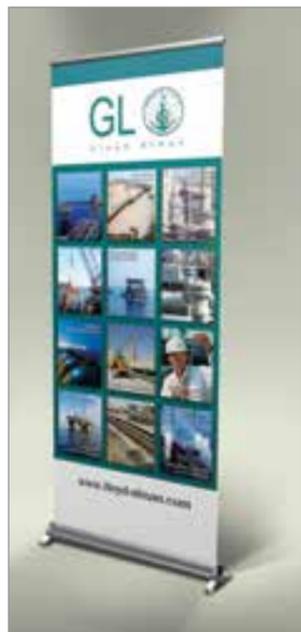

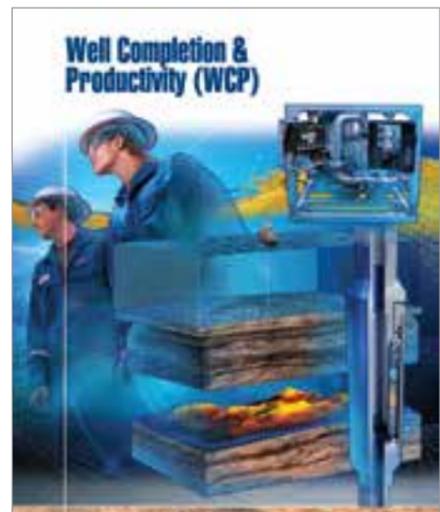

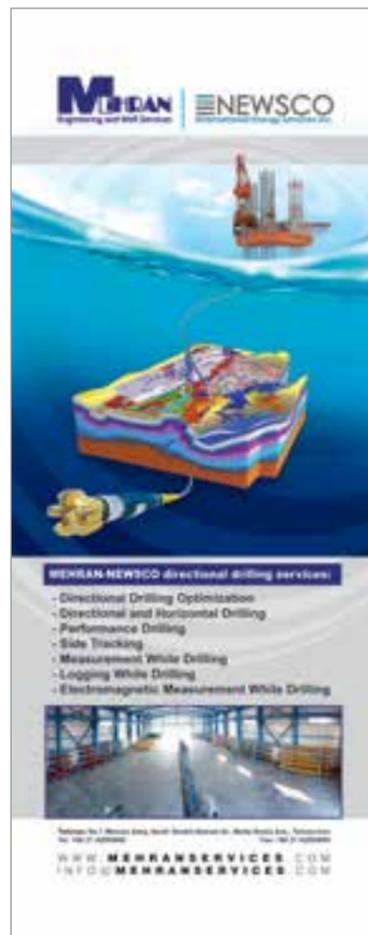

You can't afford to leave marketing material as critical as a company profile to anyone less than a professional. Our creativity, experience and skill ensure nothing but the best quality – all at a price that suits your pocket. We custom design your company profile to your exact specifications. And even if you're not quite sure of what it is you're looking for, we guarantee a design that will blow you away and impress your potential clients. Let each page in your company profile perfectly represent your products or services.

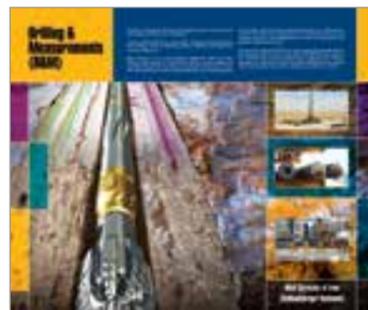

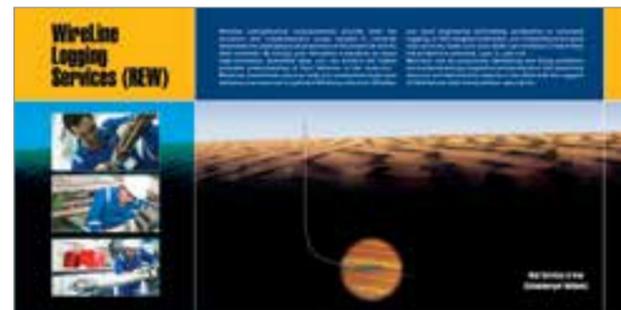

Good Design Makes The Best Economic Sense

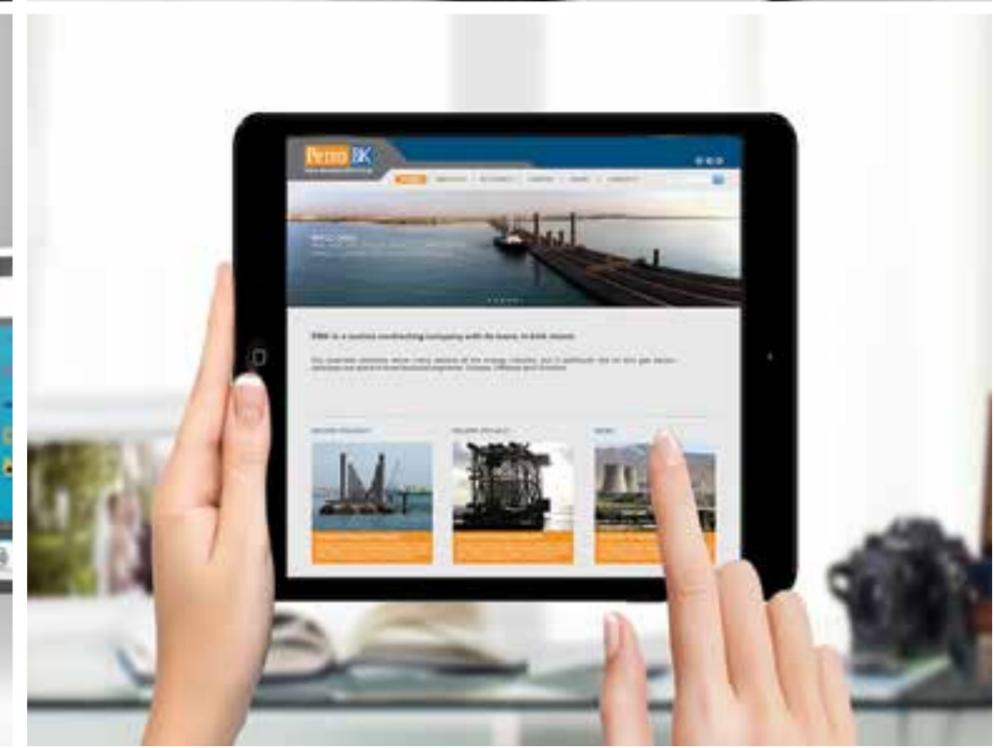

One of the most important topics for business owners tends to be corporate identity and branding. This makes a lot of sense. After all, your logo, branding and your corporate identity is central to your marketing strategy, it is the visible badge representing your standards, vision and values. If your product or service isn't looking its best, what do you compete on? Price! Statistics indicate that two-thirds of companies who ignore design have to compete mainly on price. According to research, good design makes the best economic sense. Iran Petro Graphic can visualize, create and implement a unique design and corporate identity for your company, along with complementary branding for your products, services and business streams.

Infograph Design

Every picture tells a story, but sometimes it takes a clever combination of words and images to tell a story quickly, concisely, and in an entertaining fashion. With creative design elements and relevant content, infographics get your audience to take action. Plus, infographics are fun and easy to share, which gets your company noticed! Take a look to these sample we provide for you from internet. Iran Petro Graphic through cooperation with Iran Animation Studio, is ready to design every infographic project for oil and gas companies. Please have another look to our animation samples and our graphic designs. You will be sure that we can provide very good infographics for your projects.

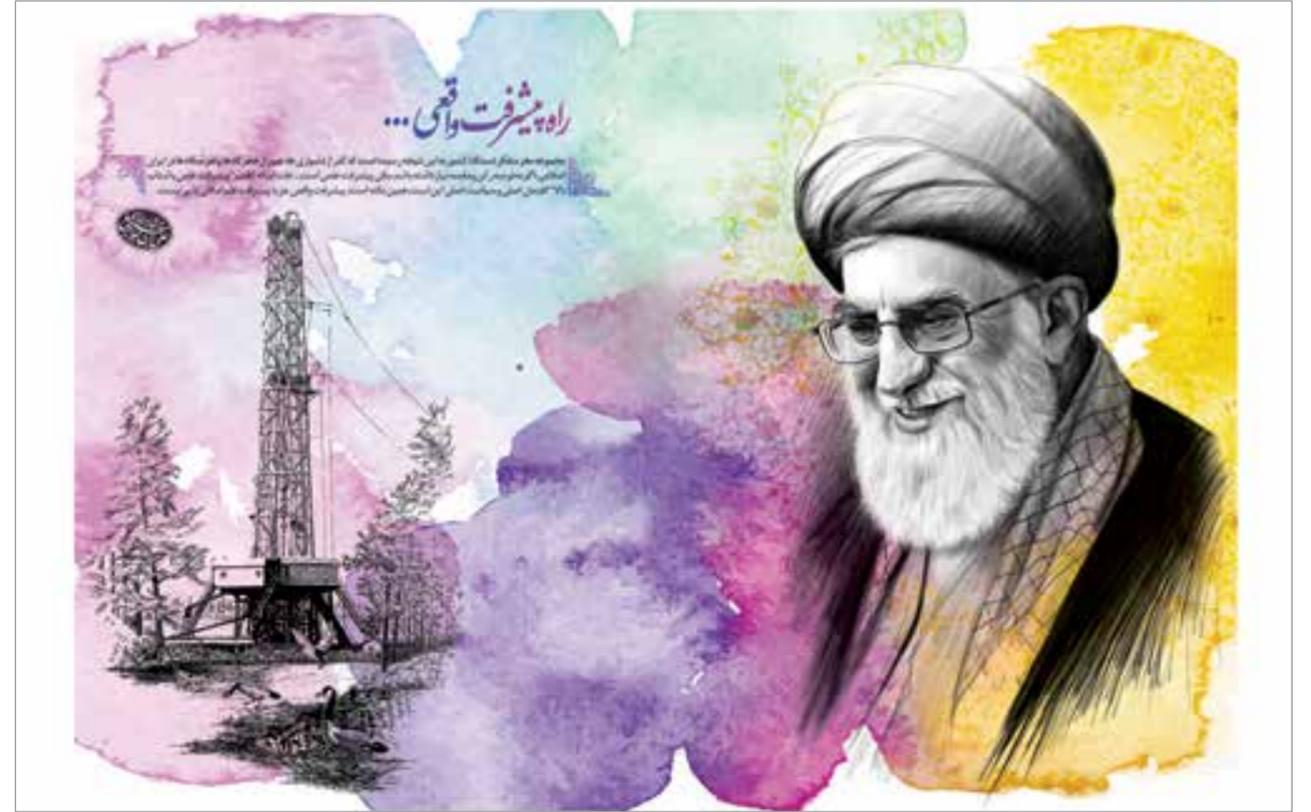

■ We Provide What Your Customers Need To See

Your website may be the main line of communication between your customers and your company in the oil industry. Even if you don't conduct all of your business through your website, it may be just what your customers need to see in order to choose you over a competitor. Let us help you to create an effective online marketing presence that turns your website into a platform that entices visitors to become customers. So if you are looking for a trusted reputable web design group to handle all of your online business needs, then look no further. We offer competitive pricing and solutions that go beyond just building a website, as we will take the time to integrate it into your business and provide training and consultations on how to get the most from your online presence. Iran Petro Graphic has a vast amount of web development experience providing web and graphic design services and solutions to the oil and gas companies.

We Take Pride In Our Work

If you thought graphic design was just about brochures, business cards and letterheads, think again. We know what it takes to get your company noticed. Over the years we have established a distinct style that suits any fun, contemporary or corporate client. Although our portfolio is so huge we can't show all our clients' work in our company profile, but we truly believe you will find something to your liking out of a wide range of design elements from our clients. What your company does in the oil industry, is your business – but the way you look while doing it, is our business.

Creative Look, Lasting Image ...

About Iran Petro Media

Iran, as one of the most important energy supplying centers in the world, has always been considered by the international media and documentary makers, to monitor the news and activities done in this crucial region. For this reason, in addition to reflection of much news by the international media of the Iran's energy field changes, many documentary makers have recorded the activities done in Iran to show to their addressees across the world, which sometimes political orientation against Iran and distortion in expressing the facts, can be seen in them.

In this respect, Iran Energy Club with its strong research team and valuable sources, established Iran Petro Media Group to improve picturing the activities done or are going to be done and also to create a strong documentary making team, so as to fulfill the domestic companies' needs. Besides providing specialized services in documentary making and photography of implementation process of industrial projects in energy fields, this team is making a documentary series aiming to improve the way of thinking, knowledge and national sensitivity in energy field and international security (with the approach of domestic & global needs regarding correcting the consumption pattern)

■ Video & Film

With proven video production expertise and unmatched experience in the oil and gas industry, Iran Petro Media can work all over the Country; onshore and offshore. We shoot exciting film footage that brings the industry to life. Our edited video programs often incorporate other expressive tools such as graphics and animation.

Photography

Iran, as one of the most important energy supplying centers in the world, has always been considered by the international media and documentary makers, to monitor the news and activities done in this crucial region. For this reason, in addition to reflection of much news by the international media of the Iran's energy field changes, many documentary makers have recorded the activities done in Iran to show to their addressees across the world, which sometimes political orientation against Iran and distortion in expressing the facts, can be seen in them. In this respect, Iran Energy Club with its strong research team and valuable sources, established Iran Petro Media Group to improve picturing the activities done or are going to be done and also to create a strong documentary making team, so as to fulfill the domestic companies' needs. Besides providing specialized services in documentary making and photography of implementation process of industrial projects in energy fields, this team is making a documentary series aiming to improve the way of thinking, knowledge and national sensitivity in energy field and international security (with the approach of domestic & global needs regarding correcting the consumption pattern)

Petromedia Services & Capabilities

- Management and producing industrial documentaries in the field of energy
- Managing and producing political-security documentaries in the field of energy
- Translating and dubbing industrial documentaries in different areas of energy
- Providing consulting services for design ideas and scenario writing
- Designing popular TV competitions in the field of energy
- Presenting 360-degree photography services
- Augmented Reality

Our Media Services

Beyond Iran's borders, although activities of centers which professionally monitoring the global news and changes in energy field have caused the foreign companies to access appropriate sources for latest news and global changes, but this opportunity for many reasons, which we do not intend to mention herein, is not available for Iranian companies and those which have access to their needed information, must spend too much time and money to obtain such a information.

Moreover, the constant and successful activity in energy field, regardless of requiring the knowledge, capital, technology and industrial equipment, is in need of latest global news and changes, because field of energy always facing new needs, opportunities and challenges, and the companies being aware of the global changes earlier than others, have more opportunities to plan right and choose the best strategy.

In this respect, the Iranian Energy Club has formulated a comprehensive media policy to provide the Iranian companies which are active in various energy fields like oil, gas, petrochemical, water, electricity, new energies and ... with the required information. By its chain websites' activities in various energy fields, the Club hopes to not only provide the said companies with their required information but also to favorably reflect the Iranian Companies' achievement

and capabilities inside and outside of Iran.

Up to now we have 4 news agencies.

- Offshore Press Club, which cover everything related to offshore oil & gas news inside Iran and in the world. You can visit this website in www.opc.ir
- Iran Drilling News, which cover everything related to drilling industry inside and outside of Iran. You can visit Iran Drilling in www.irandrilling.ir
- Iran Clean Energy, which cover everything related to renewable energy news inside Iran and in the world. You can visit this site in www.irancleanenergy.ir
- Iran Petro News which cover everything related to petrochemical industry inside Iran and in the world. You can visit this site in www.iranpetronews.com

Fortunately, from the beginning of these three websites, companies have welcomed them and we are trying to expand our media activities in the future and start other news agencies in other fields, like petrochemical, online data banks and etc. That's why we want to establish Iran Energy News in the not too late future, as Iran Energy Club's specialized arm in the field of news and media activities.

IRAN ENERGY NEWS

Specialized Information Is Necessity ...

Cooperation With Iran Energy Club

Iran Energy Club invites all the youth and artists to enter the professional activities in the field of energy, aimed at choosing the proper way to start a professional career in energy arenas. So if you are interested in presenting your innate abilities and talents to the managers in the fields of energy nationwide and have the following features please contact us.

You should be aware that Iran Energy Club provides the proper ground for your progress. But keep in mind that to start cooperation with the club, you must have all these features together. So if you have these qualifications, please send your resume, picture and portfolio to us and look forward our contact. In an aim to cooperate with Iran Energy Club, you do not necessarily have to live in Tehran. We are looking for active agents nationwide to integrate the capabilities, make optimum use of the infrastructures, performs joint projects to expand the Club's activities and play a powerful role to meet the active companies' requirements in Iran's energy industry.

The most important features for working with Iran Energy Club includes:

- If you are creative,
- If you are interested in a teamwork,
- If your are honest and accept responsibility,
- If you are a patriot,
- If you are ambitious and willing to progress,
- If you are creative and have new ideas in the field of energy
- If you're looking for the ideal place to accomplish your ideas,

We Have Provided Our Services for These Companies
